

**AUTOMATION TOOL FOR WEB SITE CONTENT LANGUAGE TRANSLATION**

**ABSTRACT OF THE DISCLOSURE**

A system, method and computer readable medium for providing translated web content is disclosed. The method on an information processing system includes retrieving a first content in a first language and parsing the first content into a plurality of translatable components. The method further includes generating a unique identifier for each of the plurality of translatable components of the first content and queuing the plurality of translatable components and corresponding unique identifiers for translation into a second language. The method further includes, for each of the plurality of translatable components, storing a translated component and an associated unique identifier corresponding to the translatable component, thereby storing a plurality of translated components and corresponding unique identifiers.
